WINTER CHECKUP EVALUATION REQUEST

WINTER 2007-2008

Yes! I'd like my boat to have a FREE checkup this winter.

_____ Date _____ Boat Name _____
 Owner's Signature

Our mechanics will check for the little things that can eventually lead to major problems as your boat ages. Much like an annual physical at your doctor, preventative diagnosis makes life easier.

Things that can age over time like belts, fuel and other hoses, packing, gaskets, seals etc. will be checked out. Also any annoying leaks, corrosion on battery connections, and fluid levels will be noted.

Once the checkup is completed, you will be presented with an assessment of the current condition of the items checked, and any recommended corrective actions. You can then decide to act on any of the problems before launch next spring.

There is no charge for this service; however, we must have access to your boat.

ENGINE/MECHANICAL	
	Belt(s) (replace every 2-3 years)
	Fuel leaks
	Water leaks
	Antifreeze leaks
	Battery connection condition and tightness
	Engine corrosion
